   Yes.

Report :

- **What did you learn about the challenges new students face?**

Sometimes, they couldn't know how to get in touch with other new students before they came into university.

- **In addition to the text, sketch out a table or graph of what you learned from each of the students who you interviewed and each of the students who took your questionnaire.**

name	Jie Wang	David Dryja
learned	He has his own way to know new student only in China. However, he can't know America new student before they came to University.	He doesn't know any way to get in touch with other new student. That means he really need an app to help him to know new student.

- **How might you incorporate what you learned in a mobile application to help students at CSU?**

I can add a function like nearby-student-group to help them know who is around them and they can learn about each other.

- **What did you learn about writing interview questions and questionnaires?**

I have learned how to make a step-by-step interview questions and questionnaires. Sometimes, it's awkward to directly ask them if they need that app. So I design several really easy beginning questions to help them get involve my interview or questionnaire.
